

IGOR PEREIRA BARBOSA

Relocating independently to Dallas-Fort Worth, TX | Available onsite within 3 weeks of an accepted offer | No relocation assistance required
Currently in Woburn, MA | (781) 491-3132 | igorpereirabarba@gmail.com | linkedin.com/in/igor-barbosa12a072280 | github.com/igorpereirabarba

IT SUPPORT | ENDPOINT OPERATIONS | JUNIOR SYSTEMS ADMINISTRATION

PROFESSIONAL SUMMARY

Enterprise IT support professional experienced in resolving high-volume hardware, software, identity, endpoint, printer, and network incidents in regulated healthcare. Hands-on with Windows 10/11, macOS, Microsoft Intune, Entra ID, Microsoft 365, ServiceNow, PowerShell, BitLocker, VPN, TCP/IP, imaging, deployment, and technical documentation. Expanding systems administration expertise through independent Windows, Linux, networking, security monitoring, and Python automation labs while pursuing a B.S. in Cybersecurity with a 3.9 GPA.

CORE TECHNICAL SKILLS

End-User and Endpoint Support: Windows 10/11, macOS, desktop/laptop deployment, imaging, software installation, patching, BIOS/UEFI, BitLocker, docks, monitors, HP/Zebra printers, scanners, peripherals

Microsoft and IT Operations: Microsoft Intune, Entra ID, Microsoft 365, Teams, PowerShell, ServiceNow, Citrix Workspace, user/access support, asset inventory, incident escalation, remote and onsite support

Networking and Systems: TCP/IP, DHCP, DNS, VPN, Wi-Fi, Ethernet, network jacks, VLAN/NAT concepts, subnetting, routing/switching fundamentals, ping, ipconfig, tracer, nslookup, Ubuntu, Kali Linux, VirtualBox

Security and Automation: Splunk, Sysmon, Windows Event Logs, Python, Bash fundamentals, endpoint hardening, vulnerability-management fundamentals, GitHub, technical documentation

PROFESSIONAL EXPERIENCE

Digital Support Technician - Endpoint Operations | Mass General Brigham Digital

Aug 2026 - Present | Massachusetts

- Resolve approximately 57 weekly hardware, software, identity/access, endpoint, printer, and connectivity incidents across Windows 10/11 and macOS in a large regulated healthcare environment.

- Use Microsoft Intune, Entra ID, Microsoft 365, BitLocker, PowerShell, VPN, and ServiceNow to troubleshoot user accounts, device compliance, secure access, application, and endpoint configuration issues.

- Deploy, reimage, patch, and validate laptops and desktops; support BIOS/UEFI, docking stations, monitors, HP/Zebra printers, scanners, credit-card readers, and other clinical and administrative peripherals.

- Diagnose TCP/IP, DHCP/DNS, wired/wireless, VPN, and physical network-jack issues using ipconfig, ping, structured isolation, and end-to-end testing; escalate infrastructure issues with clear evidence.

- Document symptoms, diagnostics, root cause, remediation, asset details, and user communication in ServiceNow; collaborate with security and infrastructure teams on complex incidents and endpoint remediation.

Independent IT Infrastructure and Support Lab

2025 - Present | Windows, Linux, Networking and Automation

- Build and support a VirtualBox environment with Windows, Ubuntu, and Kali systems; configure users/groups, permissions, packages, services, SSH, logging, networking, firewall controls, and backup/recovery procedures.

- Administer an Ubuntu server hosting Splunk Enterprise and connect a Windows endpoint through the Universal Forwarder and Sysmon; troubleshoot service, log-ingestion, host, port, and connectivity issues.

- Practice DHCP/DNS, routing, VLAN/NAT, subnetting, Wireshark packet analysis, Windows Event Viewer, system hardening, authorized Nmap discovery, and written incident/runbook documentation.

ADDITIONAL EXPERIENCE

Courier / Swing Driver | FedEx Express | Oct 2024 - Aug 2026 - Managed 90-120 daily stops, time-sensitive priorities, entrusted assets, accurate records, and customer communication.

Perishable Manager | BJ's Wholesale Club | Jun 2020 - Oct 2024 - Led and trained approximately 15 associates and reduced monthly shrink from about \$40K to \$5K through process controls and discrepancy analysis.

SELECTED TECHNICAL PROJECTS

Python Support and Security Automation: Built a failed-login analyzer that applies threshold logic and produces structured incident reports; developing a phishing-email detector that parses headers, links, sender domains, language, and attachment indicators.

Endpoint, Network and Vulnerability Labs: Configure Windows/Linux security settings, review logs, analyze network traffic, identify vulnerabilities, prioritize remediation, retest changes, and document results for repeatable troubleshooting.

EDUCATION, HONORS AND CERTIFICATIONS

Bachelor of Science in Cybersecurity - In Progress | Southern New Hampshire University | Expected late 2027

GPA: 3.9 | 77% complete | President's List (4 terms) | Honor Roll (10 terms)

Fortinet NSE 1 in Cybersecurity | 2026 | In Progress: CompTIA Security+ (SY0-701) and Cisco CCNA (200-301)

Languages: English and Portuguese - Fluent | Spanish - Professional working proficiency
