

IGOR PEREIRA BARBOSA

Relocating independently to Dallas-Fort Worth, TX | Available onsite within 3 weeks of an accepted offer | No relocation assistance required
Currently in Woburn, MA | (781) 491-3132 | igorpereirabarba@gmail.com | linkedin.com/in/igor-barbosa12a072280 | github.com/igorpereirabarba

SECURITY OPERATIONS | MANAGED DETECTION AND RESPONSE | INCIDENT RESPONSE

PROFESSIONAL SUMMARY

Cybersecurity-focused enterprise IT professional supporting secure Windows/macOS endpoints, identity, connectivity, and incident documentation in regulated healthcare. Hands-on SOC practice includes Splunk/SPL, Sysmon, Windows event analysis, MITRE ATT&CK, alert triage, Linux administration, and Python automation. Pursuing a B.S. in Cybersecurity with a 3.9 GPA.

CORE SKILLS

Security Operations: Splunk, SPL, Sysmon, Windows Event Logs, log correlation, alert triage, detection logic, MITRE ATT&CK, incident documentation

Systems/Endpoint: Windows 10/11, macOS, Ubuntu, Kali, Intune, Entra ID, Microsoft 365, BitLocker, endpoint hardening, patching

Networking: TCP/IP, DHCP, DNS, VPN, VLANs, NAT, subnetting, routing/switching, firewalls, Wireshark, Nmap

Automation/Tools: Python, PowerShell, ServiceNow, GitHub, VirtualBox, troubleshooting, technical writing, customer communication

PROFESSIONAL EXPERIENCE

Digital Support Technician - Endpoint Operations | Mass General Brigham Digital

Aug 2026 - Present | Massachusetts

- Resolve approximately 57 weekly endpoint, identity/access, software, and connectivity incidents across Windows 10/11 and macOS in a large regulated healthcare environment.
- Use Microsoft Entra ID, Intune, BitLocker, Microsoft 365, PowerShell, and VPN tools to investigate authentication, endpoint configuration, secure-access, and device-compliance issues.
- Collaborate with cybersecurity personnel on security-related tickets, endpoint remediation, and a virus-related workstation rebuild; collect diagnostics, assess impact, and escalate complex issues with clear documentation.
- Document symptoms, root cause, remediation, asset details, and user communications in ServiceNow; support TCP/IP, DHCP/DNS, wired/wireless connectivity, deployment, reimaging, and patching.

Independent SOC Operations Lab

2025 - Present | Home Lab

- Operate an isolated VirtualBox SOC environment with an Ubuntu Splunk Enterprise server, Windows endpoint, Splunk Universal Forwarder, Sysmon, and Kali Linux.
- Analyze Windows Security and Sysmon telemetry with SPL; investigate failed logons, authentication patterns, processes, and network events; build detection searches and dashboards.
- Run authorized attack simulations, triage alerts, distinguish suspicious activity from noise, document response recommendations, and map activity to MITRE ATT&CK including T1110.

Independent Linux Server Administration Lab

2026 - Present | Home Lab

- Building and administering an Ubuntu server to practice services, users/groups, permissions, packages, SSH, logging, networking, firewall controls, backups, and troubleshooting.

ADDITIONAL EXPERIENCE

Courier / Swing Driver | FedEx Express | Oct 2024 - Aug 2026 - Managed high-volume routes, shifting priorities, records, entrusted assets, and customer communication.

Perishable Manager | BJ's Wholesale Club | Jun 2020 - Oct 2024 - Led 15 associates and reduced monthly shrink from approximately \$40K to \$5K through controls and process improvement.

SELECTED CYBERSECURITY PROJECTS

Python Phishing Email Detector | In Progress

- Developing a Python tool that parses email headers/content, flags sender-domain inconsistencies, suspicious URLs, urgent language, and attachment indicators, and produces explainable findings for analyst triage.

Failed-Login Alerting and Incident Report Automation | Python

- Built a Python analyzer that applies threshold logic and generates structured alerts/reports with incident ID, severity, status, Event ID 4625, and MITRE ATT&CK T1110 mapping.

Vulnerability Management Lab | Windows, Ubuntu and Kali Linux

- Practice vulnerability identification, CVSS prioritization, remediation planning, retesting, and residual-risk documentation across isolated Windows/Linux systems.

Linux, Network Security and Windows Hardening Labs

- Configure Linux permissions/services/logging/firewalls; use Wireshark and Nmap; practice VLAN, DHCP/DNS, NAT, routing, Windows hardening, and event analysis.

EDUCATION, HONORS AND CERTIFICATIONS

Bachelor of Science in Cybersecurity - In Progress | Southern New Hampshire University | Expected late 2027

GPA: 3.9 | 77% complete | President's List (4 terms) | Honor Roll (10 terms)

Fortinet NSE 1 in Cybersecurity | 2026

Certifications in Progress: CompTIA Security+ (SY0-701) | Cisco CCNA (200-301)

Cisco Networking Academy: Junior Cybersecurity Analyst Career Path; Cyber Threat Management; Network Defense; Endpoint Security; Networking Basics

Languages: English and Portuguese - Fluent | Spanish - Professional working proficiency
